

# CONTOUR PARQUET

## Layout Service

To ease and speed the installation and reduce wasted time and materials, our layout service is available on all our Contour Flooring. With our optional layout service panels and planks are trimmed to fit into individual rooms and includes the necessary features required to produce a finished floor such as thresholds, nosings, fireplace frames, plank and custom borders. We reproduce your rooms in our facilities and using our experience create the most aesthetic layout of the panels selected. Your floor arrives on the job site as a room kit with all pieces numbered, a floorplan and a room template, ready for installation. Since your floor is precut and prefinished in our controlled environment the amount of time necessary for onsite completion can be reduced by eighty percent over conventional methods. Upon installation our panels and planks yield a floor that appears as a true antique installed centuries ago.
